

DANIELS HEALTH **Surgical Solutions**

PROVIDING THE SAFEST AND MOST EFFICIENT
SOLUTIONS FOR YOUR SURGICAL WASTE NEEDS

Safe and Ecological Operating Room Solutions

With the second largest national service infrastructure in the United States, Daniels Health is a full waste management partner to the US healthcare industry. Providing the safest innovative containment solutions, tailored waste mapping, online and onsite education, compliance and regulatory expertize, flexible pickup scheduling without hidden fees, and specialized treatment services, Daniels is the clear leader in safe and ecological surgical waste management.

SUSTAINABLE RMW AND SHARPS SOLUTIONS

Daniels reusable medical waste and sharps management systems are proven to reduce infection transfer risk, provide unparalleled placement and movement efficiencies, ensure staff safety and dramatically improve waste segregation in surgical environments. Daniels' versatile accessories enable point-of-use segregation of soft medical waste, laparoscopic instruments and surgical sharps whilst minimizing disposal risk to surgeons and scrubs staff.

PHARMACEUTICAL WASTE SOLUTIONS | PUTTING SECURITY FIRST

Mitigating unnecessary risk for healthcare practitioners and the public in the containment, disposal, transport and destruction of pharmaceutical waste, the Daniels reusable system forms part of a safeguarded waste journey that eliminates tampering, pillaging and misappropriation of discarded pharmaceuticals. Daniels Pharmasmart containers feature no-hand-access safety trays, secondary locking mechanisms and leakproof seals to ensure the security of high risk contents is maintained.

SPECIALIZED AND REGULATED RCRA WASTE SOLUTIONS

Specialists in the management of RCRA and hazardous wastestreams, Daniels positions itself as an astute partner to healthcare facilities in navigating complex compliance regulations and ensuring minimized risk in the collection, transport and treatment of RCRA waste. With a product range suited to all volume and facility requirements, we work with our customers to tailor a secure waste management solution specific to individual facility needs.

CHEMOTHERAPY WASTE SOLUTIONS | CHOOSE REUSABLE

Daniels' industry-leading reusable systems for trace chemotherapy waste set new standards in infection control, environmental effectiveness, compliance, segregation potential, and logistical cost savings. With foot-pedal operation, leakproof body and lid seals, multi-option mounting and point-of-use positioning for soft waste and sharps disposal and segregation, Daniels chemotherapy containers and versatile accessories ensure staff and patient safety in oncology settings.

With with 23 plants and transfer stations across North America and over 100 vehicles in our service fleet, Daniels Health handles your waste every step of the waste journey from point of generation, to transport and disposal.

Full containers are picked up direct from your facility by Daniels staff and exchanged with empty containers.

Waste is transported by our own fleet to a Daniels facility.

Containers are processed at a Daniels operated facility with all waste disposed of and treated in accordance with EPA guidelines.

Sharpsmart

The Daniels Sharpsmart system is the world's safest and most environmentally responsible sharps management system.

Peer reviewed in four independent studies and relied on by healthcare facilities around the world, the Sharpsmart system is driven by a single objective - **To Save Lives.**

Sharpsmart Statistics

DATA EXTRACTED FROM
PEER REVIEWED, PUBLISHED STUDIES

AUTHOR: TERRY GRIMMOND
Microbiologist | FASM, BAgrSc, GrDpAdEd

Volume of plastic eliminated annually in the United States. ➡ **6600lbs** PER 100 BEDS

Weight of disposable sharps containers eliminated from landfills each year by using reusable Sharpsmart containers. ➡ **2072,300** lbs

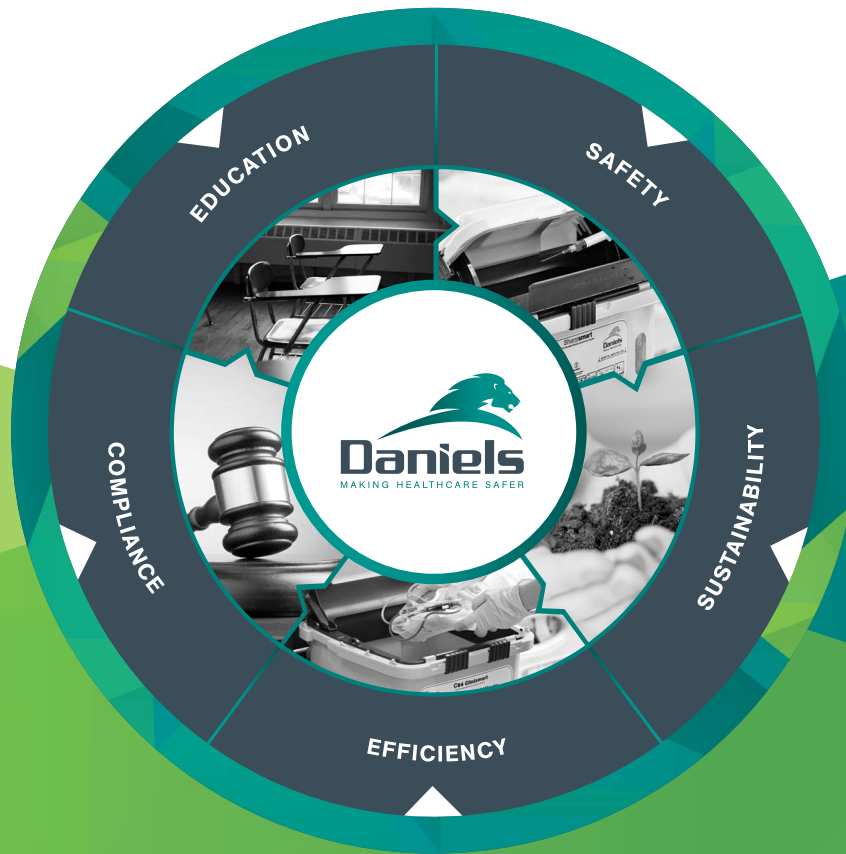

This is equivalent to the weight of nearly three Airbus A380's. ➡ **3x** AIRBUS A380

OR the equivalent of the weight of 3500 male grizzly bears. ➡ **3500** MALE GRIZZLY BEARS

The Daniels Difference

Healthcare Waste Management cost efficiencies are derived from the successful deployment of five key elements.

At Daniels Health we work closely with our customers to ensure that all healthcare staff are protected, trained and equipped, that the facilities' risk profile is managed, and waste management costs are minimized.

Safety: Our highest commitment is safety; through intelligent products, systemized solutions and bespoke training, we work with our customers to reduce needlestick injuries, minimize infection transfer and provide solutions that protect the safety and minimize risk for staff and patients.

Sustainability: Our reusable products and environmentally responsible treatment services are designed to maximize segregation, reduce CO₂ burden and minimize waste going to landfill. Through waste mapping, auditing and environmentally graded solutions, we work with our customers to achieve the highest green ratings.

Efficiency: Daniels Health optimizes the efficiencies of healthcare environments through smart products, process re-engineering and redefined waste handling methodologies. Significantly reducing the labor used in the handling of waste through point-of-use bagless containment systems and an extensive range of mounting options, accessories and logistical solutions, our customized services guarantee optimized time and movement efficiencies.

Compliance: Experts in the regulatory complexities governing the healthcare sector, we position ourselves as an astute partner delivering expert guidance and compliant products and services to our customers. Assessing unique requirements within the four walls of a facility, Daniels' tailored compliance solutions are up-to-date with all state and federal regulations, and are executed through waste plans, onsite consultancy and online training to achieve optimized safety and compliance.

Education: Our ongoing commitment to educate staff within healthcare ensures that together we achieve greater safety awareness and drive behavioral change in waste management, segregation, compliance and best practice management. Through a blended learning approach using onsite training and a range of educational material and module-based e-learning, we ensure all healthcare staff are trained and compliance certified.
