

DANIELS HEALTH

Purchased Services

Delivering value,
efficiencies and
clinical outcomes

DELIVERING CLINICAL OUTCOMES

Our 5 key variables ensure cost minimization through our purchased services approach:

SAFETY

Protecting the safety of healthcare workers, patients and the caring environment through elimination of Sharps Injuries and Healthcare Acquired Infections.

SUSTAINABILITY

Alignment with the Waste Hierarchy in promoting best practice disposal to improve recycling, optimize segregation, and reduce associated CO2 output.

EFFICIENCY

The efficient segregation, movement and storage of Healthcare waste through optimized planning, superior mounting and movement solutions, and analysis of waste output.

COMPLIANCE

Consistent segregation, audited composition analysis and reporting of waste output to ensure all regulatory requirements are attained.

EDUCATION

Consistent touch point education of all Healthcare and support staff to ensure all key areas of need are understood and being performed.

With 32 years experience leading innovative change in the management of healthcare waste across six countries, at Daniels
WE THINK DIFFERENTLY.

Servicing within the four walls of your facility.

1 PLANNING & KPI DEVELOPMENT

Prior to commencement of our partnership, Daniels will undertake a review of your current waste plan and disposal trends to understand where there are potential gaps and opportunities for improvement related to your waste management procedures.

2 OPTIMIZED TOTAL WASTE SEGREGATION, DISPOSAL & CONTAINMENT SYSTEMS

Daniels' premium range of clinically designed products and services will deliver integrated value at point of care with segregation efficiencies, volume reduction and risk minimization at every intersection of the waste journey, thereby ensuring our partnership supports your facility in achieving its identified goals.

3 DEVELOPMENT OF A BESPOKE EDUCATION & COMPLIANCE PACKAGE

Following identification of your KPI's and contracted products and services, Daniels Health will utilize our proven methodology for delivering touch-point education via a blended learning approach. Our education methods ensure staff competency is achieved whilst minimizing the time that healthcare workers are away from patient care.

4 VERIFICATION OF KPI PERFORMANCE

Our verification practices are designed to consistently validate our partnership performance related to the 5-needs of healthcare waste management. This consists of regular onsite department-level checks, waste segregation and compliance audits, and training throughout the contract partnership.

5 CONTINUAL IMPROVEMENT

Following consistent compilation of audit data and contract performance (related to the KPI's established at the beginning of our partnership), a quarterly review meeting will take place with key department leads and the strategy for the following quarter will be discussed and agreed.

DANIELS PREMIUM PRODUCT SUITE

Daniels specializes in clinically designed products for all waste streams. Our innovative designs feature...

- ▶ **OVERFILL PROTECTION**
- ▶ **NO-HANDS ACCESS SAFETY TRAY**
- ▶ **PENETRATION-RESISTANT PLASTIC**
- ▶ **INBUILT PERMANENT LOCKS**
- ▶ **LEAK-PROOF SEALS**
- ▶ **POINT-OF-USE MANEUVERABILITY**
