

Available on MHA and Navigator Contracts

Daniels Health.

A Navigator healthcare waste management partner for Skilled Nursing facilities.

INFECTION CONTROL THROUGH MEDICAL WASTE SOLUTIONS

Daniels Health is proud to offer healthcare waste containment solutions that actively promote infection control in the Skilled Nursing environment. All of our reusable containment systems are expertly installed to provide point-of-use disposal or implemented onto our mobile carts to help you easily remove waste from the patient environment.

Through optimum wall-mounted sharps container placement or use of the Accessmart cart that can house both red bag and sharps waste containers, your facility can easily reduce the overall container touches required when handling medical waste. In fact, all Daniels health solutions are designed to only be touched twice: once when placing a new, empty container and secondly when permanently locking a full container to securely transport it to a soiled utility room. Fewer touches results in lowered risk of infection for both staff and patients.

Educational Resources

We are constantly adding education materials to our website that healthcare providers can utilize whether they are customers or not.

Our Knowledge Center has:

- ▶ **Downloadable SOPs**
Print these documents to build confidence in proper healthcare waste management processes
- ▶ **Industry Case Studies**
- ▶ **Blogs**
Keeping you up-to-date on regulation changes, best practice, and interviews with our team members
- ▶ **Operational Videos**
