

## NON-CDL DRIVER: Job Description

We are looking for a driver who can operate a box truck (26 feet) that is an enthusiastic, customer service focused individual.

Our drivers are responsible for dropping off our sanitized containers as well as picking up our secured containers that contain sharps, medical materials and/or alike hazardous materials to be brought back to our treatment facility for decanting and disposal. You will work around 40 hours per week, and generally no weekends! No commercial driving experience necessary - this is a great opportunity for someone who wants to start their driving career!

Our routes involve both larger and smaller customers whereby you are handling box stops, providing customer service to our varied and valued customers and manually handling containers by loading and unloading your van or truck whilst prioritizing and organizing to keep sanitized sharps and medical waste containers segregated from used containers to avoid cross contamination.

### WHAT EXPERIENCE DO YOU NEED TO BE SUCCESSFUL?

- ✓ Happy to work approximately 40 hours per week
- ✓ Delivery experience within any industry where you have dealt with manual handling (advantageous not mandatory)
- ✓ Loading and unloading | Prioritizing and organizing your truck per schedule and needs
- ✓ Sound customer service experience | Greeting customers and dealing with any issues they might have
- ✓ Operate vehicles in a safe manner (as large as 26 ft box trucks)
- ✓ Managing a route per leaderships direction | delivering timely, efficient and effective service
- ✓ Clean driving record

This is a genuinely hands on role, in a fast-paced environment to help us positively service our customers. It includes some heavy lifting and regular contact with customers, production associates in our plant and leadership.

### WHO ARE WE? WHY WOULD YOU WANT TO JOIN US?

We are a healthcare service company providing safety systems and medical waste collection for hospitals, medical centers, pharmacies, nursing homes and an array of customers within the healthcare setting. Our focus is delivering quality and safety-focused medical waste management services that reduce needlestick injuries, positively impact infection control and reduce environmental burden.

We are a growing company with endless possibilities for growth; you will not feel stuck in your position. Daniels Health offers support and training for those that really want to make an impact and grow personally and professionally in their operations career.
