

## Medismart

The Daniels Medismart system introduces a new standard of safe medical waste management. With proven infection risk minimization, segregation efficiencies and environmental burden reduction, the Medismart combats logistical challenges commonly associated with healthcare waste disposal whilst keeping staff and patient safety the highest priority.

**A 3 year study examined the impact of transitioning from their 64Gallon bin to the Daniels 17Gallon Medismart...**

### RMW MASS REDUCTION

Medical Waste mass  
reduction of  
**53.2%**

### RMW VOLUME REDUCTION

Medical Waste volume  
reduction of  
**65.2%**

### REDUCED LABOR IN HANDLING

Labor cost reduction  
associated with  
logistics in handling  
waste of  
**69.2%**

### REDUCED DISPOSAL COSTS

Medical waste disposal  
cost reduction  
**30.9%**

### INFECTION / SHARPS RISK REDUCTION

Minimized infection  
potential and  
sharps injury risk.  
Efficiencies in space  
and waste movement  
gained

# Regulated Medical Waste

**M64 Medismart**

The reusable Medismart system can help you make a significant waste reduction impact. Clear labelling and the easily identifiable design of the Medismart container encourages better waste

**Fill Capacity:** 56 Quarts

**28 Gallon Tub**

The 28 Gallon reusable bulk RMW container is for high volume areas with a large amount of bulk RMW

**Dimensions:** H 22.9 inch x  
W 18.9 x D 18.9

**38Gallon Tub**

The 38 Gallon reusable bulk RMW container is for high volume areas with a large amount of bulk RMW.

**Dimensions:** H 31.8 inch x  
W 18.9 x D 18.9

**96 Gallon Bin**

The 96 Gallon reusable bulk RMW container is meant for the docking area or large soiled utility rooms where a significant amount of red bag waste accumulates.

**Dimensions:** H 42 inch x  
W 23.3 x D 34.25

The Daniels Medismart system introduces a new standard of safe medical waste management. With proven infection risk minimization, segregation efficiencies and environmental burden reduction, the Medismart combats logistical challenges commonly associated with healthcare waste disposal whilst keeping staff and patient safety the highest priority.

Our reusable 28 and 38 gallon tubs are made from UV-stabilized HDPE plastic, look smart and are tough enough to withstand the rigors of being filled, emptied, washed and reused countless times. The disposable range varies in size from 1 quart up to 3 gallons. Our single-use 28 gallon box is made from heavy duty corrugated cardboard. They are flat-packed for economical transport, easy to assemble for use and have a leak-resistant plastic liner to contain spills.
