

# HOW TO USE YOUR Rx Destroyer

## UNDER DIRECT OBSERVATION OF A WITNESS:

**1**  **Remove medication from packaging: Vial, bubble pack or foil**

**2**  **Load unused or unwanted controlled medications into the Rx Destroyer bottle**

**3**  **Gently agitate bottle so the liquid slurry pours over the medications**

**4**  **When bottle is full, secure lid and dispose**

### CORRECT DISPOSAL

Full, used Rx Destroyer bottles will be returned to Pharmacy for storage until the contracted vendor collects and disposes the waste.

If Hazardous controlled substances are disposed of into Rx Destroyer, the full containers **MUST** be placed into a Hazardous pharmaceutical container.

### PLEASE NOTE

Empty vials and ampoules must go into the sharps container. **DO NOT** place sharps or syringes into Rx Destroyer bottles. Never place controlled substances in the other waste collection units.
