

YOUR SAFETY MATTERS

Regulated Medical Waste Tub **Weight Limit**

Strive for but **DO NOT** exceed the weight limit outlined below (weight of waste + tub).
The target weight as described below is approximately NO MORE THAN 3 RED BAGS.

Please be sure to follow post treatment emptying procedures that are specific to Fresenius and follow all state medical waste protocols. **(EXTRA FLUID = EXTRA WEIGHT)**

- ▶ Strive for but **DO NOT** exceed 3 total red bags per each tub.
- ▶ Once the tub has 3 red bags inside, the tub is at the weight limit and can **NOT** be filled any further, and will need to be collected and replaced by the Daniels Health service team.
- ▶ Overweight fees are charged at \$1 per pound exceeding 3 red bags. Each red bag placed in the tub that exceeds 3, results in significant overweight fees for the clinic.
- ▶ Tub + 3 red bags = 193lbs total, which is the total weight limit of tub. Ensure you follow this rule and **DO NOT** exceed 3 red bags per each tub.
